

Program: Chemistry (15025012071P6)

Course: RESEARCH SEMINARS II

Code: PPGQU0043

Workload: 40 hours

Credits: 02

Syllabus:

The main objective of the Research Seminars II course is to discuss relevant topics that allow master's students to keep up with the themes being discussed in the academic environment. The seminars will be given by specialists in various areas of chemistry and related fields. They will also be presented by the students of the program themselves.

Students enrolled in the PPGQ must attend qualification seminars and dissertation defense seminars, in accordance with the Normative Instruction for Qualification Exams Defense, approved by the PPGQ board. If the student does not attend the required number of seminars, they will have an outstanding issue in this course.

Bibliography:

Specific references for each dissertation project presented.
